

# EXTENSIVE OPTIONS. EXCLUSIVE OPPORTUNITIES.

**50+ majors across the arts, humanities, sciences, and social sciences. Endless possibilities at the DYSON COLLEGE OF ARTS AND SCIENCES.**

**POSSIBILITIES.** Dyson offers you opportunities to expand your intellectual landscape and to engage in professional experiences blended with academic learning that set you up for a wide range of career options.

**AWARD-WINNING.** College Federal Reserve Challenge. Model UN. Mock trial. Research. Film festivals. Our students are nationally and internationally recognized and compete at the highest levels—even besting student teams from Princeton, Harvard, Columbia, and Northwestern. They win Truman, Watson, Boren, Jefferson, Gilman, and Fulbright awards.

**NETWORKED.** Our top-notch faculty are responsive, supportive, and laser-focused on your success. They are renowned in their fields and, alongside our vast network of alumni, provide connections that lead to mentors, internships, and even jobs.

**ACCOMPLISHED.** Students conduct research on tuberculosis, HIV, and cancer in our state-of-the-art labs; write legislation that is passed into law; and address the UN General Assembly. They travel around the world to produce award-winning documentaries; take courses at the International Center of Photography; and contribute more than 30,000 hours of community service. They publish work and present at conferences around the world; perform on Broadway; and intern across the New York metro area.

**PREPARATION.** We work hard to prepare our students for careers after graduation or graduate studies. Whatever your pursuits—humanitarian, educational, creative, financial, cultural, scientific, environmental, or the helping professions—you will graduate with the skills you need to achieve your goals.

**> Who hires Dyson students?**

- *Hamilton* on Broadway
- NBCUniversal
- Office of the Chief Medical Examiner
- PepsiCo
- US House of Representatives...and more!

**#1** college fed team in the country for the last three out of four years
